

I build things for the web, follow my curiosity wherever it leads, and write about what I find along the way.

Somewhere between technology, the internet, media, and endless rabbit holes, I'm always learning, building, and looking for the next interesting question.

AREAS OF EXPERTISE

01. Build

Engineering fast, accessible websites and web applications with modern technologies and a focus on performance and usability.

Web Architecture

WordPress

Static Sites

UI Design

02. Research

Exploring questions, studying the digital world, and digging deeper into the ideas, systems, and forensic verification behind it.

OSINT Forensics

Fact-Checking

Digital Culture

SEO

03. Write

Turning complex ideas, technology, research, and insights into clear, engaging, and accessible analytical stories.

WHAT PEOPLE SAY

“Maroof built our news website from scratch. He understands the specific needs of media portals in Kashmir—fast loading, easy CMS, and great layout.”

Imran Nazir

News Portal Owner

“Our rankings were stuck until Maroof stepped in. His technical SEO audit was an eye-opener. He fixed indexing issues we didn’t even know existed.”

Showkat Ahmad

E-commerce Manager

“The website audit report was detailed and easy to understand. He optimized our site speed significantly. Highly professional approach.”

Dr. Bilal Wani

Educational Consultant

VISIT MY BLOG

I occasionally write about technology, the internet, research, Kashmir, and ideas that catch my curiosity.
